

FORMAL PETITION OF SKYGUARDS, ALTERNATIVA AND TERRA SOS-TENIBLE TO THE EUROPEAN PARLIAMENT

The conference “Beyond Theories of Weather Modification – Civil Society versus Geoengineering” was held on 9th April 2013 in the European Parliament, under the patronage of the Greens and the European Free Alliance. Considering the extreme seriousness of the issues, as emphasized in the enclosed final intervention: “Summary, Remarks on the Conference and Skyguards Petition”, registering the main concerns of European civil society that were outlined in the conference, we would like the following to be noted:

1. For over a decade Europe has been subjected to massive clandestine aerosol spraying, for purposes that can only be guessed at, but are often assumed to include attempted mitigation of an officially identified global warming/climate change problem and/or facilitation of the operations of HAARP and HAARP-related activities such as those of MUOS in Sicily.
2. These actions are being implemented outside of any legal framework, national or international, without the knowledge or informed consent of the population, and in violation of the most elementary precautionary principles.
3. The consequences of these actions for peoples' health and life on the planet are incalculable;
4. National governments, which have the duty of authorizing the use of national airspace for these ends, deny that these actions are taking place.
5. Institutionalized denial of obvious facts that violate fundamental human rights (the right to health, to security, to physical and psychical integrity) leaves citizens totally defenceless.

FROM THE EUROPEAN PARLIAMENT

We demand effective protection of European citizens. Given that the European Parliament has at its disposal the juridical instrument of the extraordinary parliamentary investigative committee, we demand (1) that this essential instrument be employed without any further delay, (2) that the present proposal be taken to the Presidency of the European Parliament to be examined, (3) that a public debate be opened with participation from civil society, and with retention of the present platform as a contribution to the evidence and as proof of what is happening; and (4), full implementation of the proposal for resolution “On the Environment, Security and Foreign Policy” .

We therefore sign this petition in Brussels, 9th April 2013.

Josefina Fraile Martín, (President of Terra SOS-tenible and promoter of Skyguards, and Giulietto Chiesa, representing Alternativa Laboratorio Político).
