

Eugene Podkletnov / Ning Lee

http://www.space.com/business/technology/technology/anti_grav_000928.html

- In 2002, Boeing, approached Podkletnov to work with them on further research into blocking gravity.
- He has also done experiments with a “force beam” and weight reduction.
- Information is decidedly sketchy.
- Ning Li worked on a “Gravity Shielding Device” at U. of Alabama, but an article on space.com said:
- The main university professor involved with the project, Ning Li, has since left the school. She said she has founded a company in Huntsville that also will market a gravity-shield device.
- Li said she dropped the NASA collaboration and decided to work independently after the agency “wasted” the project's money and resources.

26

The Hutchison Effect - 1

- This the name given to what appeared in the video clip with Boyd Bushman & Nick Cook (which some say is just a fraud).
- Bushman hinted to Nick Cook he should take a trip to Vancouver to see John Hutchison – the person who did the “tricks” in the video.
- Hutchison can produce this effect with between 75 W and 1.5 kW of power.
- In November 2008, he reproduced the levitation effect as part of a “challenge”.
- Melting and Fusion of metals also seems to be an occasional side effect – as shown in the photo (right).

23

Black Projects - Research at Lockheed Martin - 1

- Some people seem to dismiss the idea that Anti-Gravity technology has been researched by US defence companies or the Air Force.
- In a documentary broadcast in 1999 on Channel 5, Boyd Bushman confirmed their research.
- Boyd Bushman also appeared to confirm that this research had produced results.
- Nick Cook of *Jane's Defence Weekly* spoke to him in about 1998.
- Bushman's words were:
 - "What we have is wonderful and it comes from miracles occurring, but that that we will see is not what we have."
 - "I am refining and heading towards something that all you have to do is charge and it is lifting up – it is losing weight."
 - "When we complete the technology, it should fly."

28

The Biefeld-Brown Effect - 5

- Many scientists say that there is no electro-gravitic effect – it is a by-product of air ionisation or an “ion-wind”
- However, calculations seem to show that “Ion Wind” alone is not enough to account for the amount of lift/thrust produced.
- With the Electric Balance, the Ion Wind should cease when the power is switched off (I think), but the balance levels as the capacitor discharges.
- It is fairly easy to build a **Lifter... using a High Tension source (old TV), Balsa Wood and Aluminium Foil**

21

Fouché in Area 51

- Edgar Fouché spoke to a number of people involved in Black projects – including people who piloted the SR-71 (Blackbird)
- Fouché describes a story of secretly being driven to an “unknown desert location” to work on Crypto equipment, in which he was an expert. But he knew this was somewhere near Groom Lake, where secret aircraft, such as the F-117 Stealth Fighter were tested.
- He states that, in the late 1970’s, when he had to fix some equipment, he came across and inspected a module labelled "Direct Orbital Code Link", which contained advanced electronics. The meaning of this was confirmed in later conversations about satellite communications.
- He states he overheard conversations, while working there, about Quasi-Crystals which were an enabling technology for advanced communications and propulsion.

30

Schematic of Capacitor-weighing Balance

TR-3B – Secret USAF Craft - 1

- Fouché describes how he has seen photographs of a triangular craft called TR-3B, taken by someone who was giving Mission Support on a C-130.
- The TR-3B is thought to be part of the Aurora (Advanced Aircraft Development) programme.
- One of Fouché's associates states he saw the TR-3B at Papoose (part of Area 51). It hovered silently in the same position, for some 10 minutes, before gently settling vertically to the tarmac. At times a corona of silver blue light glowed around the circumference of the massive TR-3B.
- The operational model is 600 feet across.
- Fouché states that at least 3 of the billion dollar plus TR-3Bs were flying by 1994.
- The craft can travel at up to Mach 9 in any direction (due to reduced G-forces).

32

German Research & “The Bell”

- A number of unusual experiments seemed to have been carried out by the Germans in the 40's e.g. Schauberger's “Repulsine”, which was an over-unity implosion device, possibly similar to the Hydrosonic Pump, but Schauberger reported his actually lifted off during testing.
- One of the experiments Nick Cook found some evidence of was **The Bell**. It was conducted in a mine in what is now Poland (but was Germany in WW II).
- As with similar experiments, it had components rotating at very high speed and it has been said that this would have the bizarre effect of “influencing the space-time field”.
- This seems to be a recurrent theme – and such experiments are often said to produce anomalous energy or field effects – much like those observed near Flying Saucers.

Artist's impression of “the Bell”

17

Results of the Research?

- Someone has suggested to me the following equation may give an answer to what has been produced by this research...

(Tesla + Thomas Townsend Brown)
x 30 years x ?billion dollars =

Spaceship!

- So now, let's review some history – and a connection which spans across history

34

“The Hunt For Zero Point”

- Nick Cook, journalist and former editor of *Jane's Defence Weekly* became intrigued when someone sent him an article about anti-gravity research.
- He tried to follow up a contact, George S. Trimble, whom, he had read, had worked in the field of anti-gravity research in the 50's.
- Trimble initially agreed to be interviewed, but then withdrew suddenly – reportedly “scared”.
- Cook continued his research “quietly” over 10 years and journeyed some way into the “black world” of defence research during World War II.
- His book “The Hunt For Zero Point” is the story of that journey.
- Here, he talks about some of his findings, initially about American Research.

5

Flying Triangle Sightings

- Thousands have now been documented in a study by NIDS and other individual researchers such as Omar Fowler
- One was in the Sheffield Area in 1997
- one was in Cannock Chase, UK, Staffordshire in 2002
- http://ourstrangeplanet.com/index.php?option=com_content&task=view&id=65&Itemid=60

36

Thomas Townsend Brown - 3

- He worked in a field which has come to be known as **Electro-gravitics**.
- TTB patented a number of his "inventions"
- In the 1950's, he worked at the Bahnon Lab.
- In a response letter written to an interested person in January 1982, TTB wrote:

"I regret to advise you that electrogravitic research has been taken over in its entirety by a Californian corporation which has imposed secrecy - at least until their investigations are completed".

13

A Link Between Gravity and Magnetism?

- A NASA Science Story from 20th April 2004 talks of a new probe ...
- **“In Search of Gravitomagnetism Gravity Probe B has left Earth to measure a subtle yet long-sought force of Nature.”**

38

Thomas Townsend Brown - 1

- Thomas Townsend Brown was born in Ohio.
- Townsend Brown never obtained a degree. He spent time studying at several schools including Caltech, Kenyon College and Denison University.
- He has been called a Physicist but was probably an Electrical Engineer more than anything else.
- He served in the US Navy in the 1930's at the Naval Research Laboratory.
- He was involved in Project Winterhaven – a research proposal to build an Anti Gravity craft, based on the work Townsend Brown had already completed.
- He died in California in 1985.
- Much of his work still seems to be kept “under wraps” and his family keep a low public profile.

Thomas Townsend-Brown (1905-1985)

11

So if there is something real in all this...

Why the secrecy?

- ✓ Free energy for everyone (not allowed)
- ✓ Freedom for everyone who has the tech (not allowed)
- ✓ BUT Also...

IT'S ALREADY BEEN WEAPONISED AND USED...

40

History of Anti-Gravity Research - 1

- This may have even started in the early days of electric power, around 1900.
- According to Nick Cook's research (discussed later), there was open discussion of the subject among groups of scientists until about 1956, when it seemed to become the subject of ridicule and/or went "underground".
- There are many historical, even mythological, figures who have supposedly experimented with gravity control.
- Two prominent names are **Nikola Tesla** and **Thomas Townsend Brown**.

Nikola Tesla (1856-1943)

Thomas Townsend-Brown (1905-1985)

What Technology Can do this?

- 80-90% if 2 of the worlds tallest buildings disappeared in 20 seconds... Where is the rubble?

<http://www.drjudywood.com/>

42

What is Anti-Gravity/An Anti-Gravity Device?

- Any device / method capable of **changing** the *local gravitational field strength* or *having the effect of reducing an object's weight*. (No "propellant")
- Another term might simply be **Gravity Control**.

44

What is Gravity 3?

- Gravity is **WEAK** in comparison to the other forces of nature.
- String theory suggests, then, that:
 - ◆ Gravity may be similar to other forces.
 - ◆ Part of its force acts “in another dimension”.
 - ◆ Alternatively, it may be a force “leaking” from another dimension into our own.
- This could account for it being difficult to measure **G**, the “gravitational constant” accurately (it is given a value of 6.67×10^{-11}).
- Though String Theory seems to be the most popular as a way of explaining Gravity, there is another theory called **Loop Quantum Gravity**.
- Does any of this sound like a good explanation of Gravity?

5

Levitation Effects on 9/11

See: <http://tinyurl.com/911hestudy/>

- **File no 9110506 - Michael Macko** (P4 - P5) I realized I couldn't get out from under the collapse. I dove under an ESU truck that was facing north on the west side of West Street. I dove under that and waited for the building to come down. When the building did come down, I actually thought I was trapped, and the truck was blown off me, pushed off me, I guess. It was not there. At that point I was just really shocked and didn't know what was going on at that point. I didn't know -- I was really, really shocked.)
- **File No. 9110075 - RENE DAVILA** - While we're walking I realize that we only have two people. I see my vehicle. The seats are covered. I've still got my bag. I hold it like a trophy. Like people collect basketballs. I haven't touched -- whatever the force was, it was so strong that it went inside of the bag.

46

What is Gravity 1?

- **Newtonian theory says:**
 - ◆ “**gravity**, Force of attraction that arises between objects by virtue of their masses.” (*Chambers English Dictionary – CD ROM edition 1996*)
 - ◆ The force of gravity obeys an “inverse square law” – at twice a given distance, the force is only 1 quarter as strong.
